

Verpet s.r.o. company was founded in 2011 since its establishment it has been engaged in cooperative activities mainly for the automotive sector. Since 2013 it has started to employ people with medical disabilities.

At the moment, three manual processing workshops with a total capacity of 125 places are in operation: Hradec Králové, Náchod, Hronov.

Our company owns the ISO 9001 certificate, according to which it is also guided in its activities.

We offer the following services: 1. activities in our protected workshops
2. setting up a protected workshop at your company

Activities:

Cable harnesses, Toroidal transformers, coils, chokes, connecting cables and more components from the electrical field are our main activity. During their production we carry out micro-soldering, tinning, winding machines – vertical and horizontal, fitting connections, connectors and more.

Hand processing, visual inspection

In protected workshops, we provide manual processing of products for our business partners. Manual processing operations include, for example, plucking, trimming, hand fine-brushing or cleaning, gouging, de-needling, assembly of cable harnesses, visual inspection, and more. For these activities, we use e.g. height meters, sliding gauges and many other tools. We can adapt to our client's production.

Machining

We perform preparatory, finishing and other required operations using stand drills and grinders and other small tools. We provide, for example, the winding of parts of electric motors. Deburring and cleaning of workpieces. PCB soldering, soldering, welding,...

Assembly and packaging

According to the requirements-packaging regulations, we pack the product from the supplied components, from simple to complex systems of parts.

Lacquering, painting and surface preparation, sandblasting

We provide painting of small parts using pressure guns and painting boxes.

We can also prepare the surface of the products before the next production process - sanding, degreasing, intermediate coats.

We provide **sandblasting** of small objects. Max. 50x50cm.

We are ready to establish cooperation that will be beneficial for you.

All our activities are carried out for the purpose of effective and error-free assistance in your business.

We will discuss the price calculations for the individual services offered together according to your specific requirements. The price is always related to state-provided subsidies for employee wages.

Our company is authorized to provide its business partners with the fulfillment of the statutory employment shares of persons with disabilities.
